

## Appendix 2

### **PROCEDURES FOR PREVENTING AND RESPONDING TO INCIDENTS OF BULLYING (including Cyberbullying)**

#### **Purpose**

1. Robertson State School strives to create positive, predictable environments for all students at all times of the day. The disciplined and teaching environment that we are creating is essential to:
  - achieving overall school improvement, including the effectiveness and efficiency of our student support procedures
  - raising achievement and attendance
  - promoting equality and diversity and
  - ensuring the safety and well-being of all members of the school community.
2. There is no place for bullying in Robertson State School. Research indicates that both those being bullied and those who bully are at risk for behavioural, emotional and academic problems. These outcomes are in direct contradiction to our school community's goals and efforts for supporting all students.
3. Bullying behaviours that will not be tolerated at Robertson State School include name-calling, taunting, mocking, making offensive comments, kicking, hitting, pushing, taking belongings, inappropriate text messaging, sending offensive or degrading images by phone or internet, producing offensive graffiti, gossiping, excluding people from groups, and spreading hurtful and untruthful rumours.
4. Bullying may be related to:
  - race, religion or culture
  - disability
  - appearance or health conditions
  - sexual orientation
  - sexist or sexual language
  - young carers or children in care.
5. At Robertson State School there is broad agreement among students, staff and parents that bullying is observable and measurable behaviour. When considering whether or not bullying has occurred, we will therefore avoid speculation on the intent of the behaviour, the power of individuals involved, or the frequency of its occurrence. Whether bullying behaviour is observed between students of equal or unequal power, whether it occurs once or several times, and whether or not the persons involved cite intimidation, revenge, or self-defence as a motive, the behaviour will be responded to in similar fashion, that is, as categorically unacceptable in the school community.

#### **Rationale**

6. Research indicates that many problem behaviours are peer-maintained. That is, peers react to bullying in ways that may increase the likelihood of it occurring again in the future. Reactions include joining in, laughing, or

simply standing and watching, rather than intervening to help the person being bullied. Whilst our school would never encourage students to place themselves at risk, our anti-bullying procedures involve teaching the entire school a set of safe and effective response to all problem behaviour, including bullying, in such a way that those who bully are not socially reinforced for demonstrating it.

7. The anti-bullying procedures at Robertson State School are an addition to our already research-validated schoolwide positive behaviour support processes. This means that all students are being explicitly taught the expected school behaviours and receiving high levels of social acknowledgement for doing so. Adding lessons on bullying and how to prevent and respond to it is a subset of procedures that our students are already accustomed to.

### **Prevention**

8. Attempting to address specific problem behaviours will not be successful if the general level of disruptive behaviour in all areas of our school is not kept to a low level. Therefore, our schoolwide universal behaviour support practices will be maintained at all times. This will ensure that:
  - Our universal behaviour support processes will always remain the primary strategy for preventing problem behaviour, including preventing the subset of bullying behaviour
  - All students know the 3 school rules and have been taught the expected behaviours attached to each rule in all areas of the school
  - All students have been or are being taught the specific routines in the non classroom areas, from exiting the classroom, conducting themselves in accordance with the school expectations in the playground and other areas, to re-entering their classrooms
  - All students are receiving high levels of positive reinforcement for demonstrating expected behaviours, including those associated with following our routines, from all staff in the non classroom areas of the school
  - A high level of quality active supervision is a permanent staff routine in the non classroom areas. This means that duty staff members are easily identifiable and are constantly moving, scanning and positively interacting as they move through the designated supervision sectors of the non classroom areas.
9. The You Can Do It Program gives the students language and processes to follow in the case of bullying. Through the teaching of Confidence, Getting Along and Resilience these are taught. These foundations are taught to all year levels at the same time. This helps to ensure consistency of skill acquisition across the school.
10. An initial introductory lesson for each foundation is based around the development of a joint understanding of the concept, with following lessons exploring the concept and developing strategies for when experiencing bullying behaviour either as a person being bullied, the person bullying or bystander.

11. Each of these foundations are focussed on for a term so that an in depth development can occur. Each term the foundations are revisited prior to the new one commencing. As the students progress through the school, the complexity and sophistication of the concepts are developed.
12. Students in the senior school speak at each assembly about the current foundation and act out scenarios of bullying and how to deal with them so that the remainder of the student body can see the behaviours modelled.
13. Robertson State School uses behavioural data for decision-making. This data is entered into our database on a daily basis and can be recalled as summary reports at any time. This facility allows the school to track the effectiveness of its anti-bullying process, to make any necessary adjustments, and to identify specific bullying behaviours that may need to be revisited or revised in the instructional process.
